

KEVIN WINNER PE | PROJECT ENGINEER

> Education

Bachelor of Science in Architectural Engineering
University of Texas at Austin | 2010

> Registration

Washington

Experience

A graduate of University of Texas at Austin in Architectural Engineering, Kevin brings a unique architectural perspective to structural engineering. Following graduation, he had an opportunity to travel and design orphanages in Uganda and Honduras. He joined SSF in 2013 and works on a variety of project types. Kevin likes the design challenges that single-family projects provide, but he also enjoys the longer-duration projects like community facilities, commercial buildings and multi-family apartments.
