Washington

> Affiliations

Structural Engineers Association of Washington

Experience

Brett joined Swenson Say Fagét (SSF) in 2004 and rose quickly through the ranks. He leads a team of eight engineers and serves on the firm's Management Team. Brett works side-by-side with the design and owner teams to develop structural engineering solutions for commercial, retail, restaurants, mixed-use/multi-family, and custom homes. Key to his success is his ability to provide an excellent customer experience from design development through construction administration, ultimately resulting in an outstanding project.
