Fundamentals of Engineering (FE) IL
Safety Assessment Program (SAP) Evaluator

> Affiliations

Association for Learning Environments (A4LE),
Member

Experience

Lori joined the SSF team in 2016. Designing structures since 2006, she brings a wide-range of experience with steel, concrete, masonry and wood construction for many project types. Whether designing an adaptive reuse of an historic building, or a 5 over 2 multi-family project, or an entirely new school campus, Lori's strong suits are attention to detail, communication with the design team, and the ability to design the most efficient structure for the project team.

Community (Educational, Faith, Public)
